**Supplied on net:**

## Dimensions

Thickness: 8 mm  
 Width: 23 mm  
 Length: 160 mm

## Wood species

Maple, ash, oak, smoked oak, jatoba and walnut.

## Surface

Untreated.

## Grading

Wood is a wonderful natural material, so variation vis-à-vis descriptions and photos will always occur. Any samples show only dimension and texture and cannot show the grading. Variations will certainly occur between small samples and actual deliveries for large areas.

## Exquisit

A consistently very uniform interplay of colour and the wood's texture. But growth-related variations always occur. Free of knots and chips, ingrown bark, pith etc. Mirroring and brown core occur to a minimal extent depending on the type of wood.

## Living

Vibrant and natural interplay of colour with consistent variations in the wood's texture. Mirroring acceptable, brown core occurs, depending on the type of wood. In principle, free of chips, knots, ingrown bark, pith etc.

## Under-floor heating

Under-floor heating may be used – please see the installation guide.

## Indoor climate

It is important that the surface temperature never exceeds 27 degrees! The relative humidity in the air (R.H.) must always be between 35-65% before, during and after installation.

**Always study the installation guide from HØRNING prior to installation.**

## Environment

FSC® certified wood is delivered on request.

HØRNING cares about the environment and sustainable forestry.

Naturally HØRNING is FSC-certified.

## CE-certification

HØRNING floors are generally CE certified in accordance with the EC declaration regarding wooden floors for indoor usage EN 14342.
